Mr. Vaughan Pederson
CleaneAir Services
5116 Bissonnet #466
Bellaire, Texas 77401

February 7, 2006

Dear Mr. Pederson,

Thank you for the CleaneAir Bio-sterilization services you performed in our children's and toddler's classrooms here at Memorial Drive Presbyterian Church. You have provided great benefits to us in helping safeguard the health of our children and promoting a very positive image for our education rooms.

The health of our children is very important to us. We want to provide the very best and safest environment possible for our kids as they enjoy our facilities. The sterilizing gas you use in your treatment leaves no residue and reaches places that traditional cleaning methods do not. I have to admit I was very skeptical before the treatment because I had never heard of this technology before. However, "seeing is believing", and I am definitely a believer now. The fresh, clean smell, much like after a summer rain, creates a very positive and lasting impression on our staff, members, and prospective members, alike. Though I am blessed to have a relatively new facility, I can only imagine what a tremendous effect your service would have in eliminating those "musty" smells that are so common in aging facilities. The possibilities seem endless.

Please feel free to use this letter as a recommendation and reference letter for others. In fact, your prospective customers are welcome to contact me at my office if they wish to speak to me personally. I will continue to use your services on a periodic basis to keep airborne and surface bacteria and viruses at low and harmless levels and the building smelling fresh and clean. And I intend to share this new and exciting technology with my peers at every opportunity.

Sincerely,

Carter Bliss
Director of Facilities
